

INSTALLATION:

Audio Visual Lifestyle Solutions custom installs products and support fixtures, so that even the most awkward spaces can be utilised. The beauty of being able to buy and install from one service provider ensures that customers have one uniform approach to their installation and overall sound, look and quality.

Installation services include:

- ***Full Multichoice Installation:***

This will include...

Dish

DSTV

PVR

HD PVR

Being Multichoice accredited means that customers are guaranteed a service that is not only delivered with the highest standard, but too has a follow up service to ensure that you are able to have access to your DSTV viewing at all times. (Please view our accreditation for more information)

- ***Communal Design and installation.***

Audio Visual Lifestyle Solutions work largely with building projects, and develop communal dish installations for flats, buildings, old age homes, retirement villages, town house complexes or Estates...you name it, we will customise it.

- ***Home Theatre Surround sound.***

Home Theatre Surround sound will be customised after the first initial consultation to suit the style of room the customer would like customised. Aspects such as flooring, wall, roof and furniture will be considered before a decision together with the customer's idea and expectations will be designed and selected. This method ensures that customers get what they pay for, and understand the gravity of the products they are selecting for the type of room they have.
